

## Your partner in Sheet Metal Engineering

An efficient, reliable and cost-effective partner for individual prototypes and assemblies for over 20 years.

Our supply from single pieces to batch productions of high quality steel, aluminium and stainless steel components and assemblies made reliably and on schedule.

### Our services:

Laser cutting:  
working area: 3 x 1,5 meter  
up to 20mm sheet thickness  
(steel),  
12mm (stainless steel)  
and 8 mm (aluminium)

Bending  
up to 3x1,5 meter, max.  
sheet thickness: 10 mm

Spot-welding

Gas-shielded welding  
TIG/MIG/MAG

Resistance spot welding  
(RSW)

Riveting

Blind riveting

Clinching

Doating

Deflashing

Wide belt sanding

Punch Laser Processing:  
Punch and laser cutting in one machine, fast punching combined with laser cutting of complex contours. Embossing and thread cutting in only one work cycle.

CAD construction with Auto-desk Inventor and Solid Works.

TruTops CAM system
